

Luísa Almeida Quintella

Gainesville, FL | +1 (352) 278-1661 | luisa.almeidaqui@ufl.edu | www.linkedin.com/in/luisa-almeida-quintella | <https://luisawebsite.onrender.com/>

EDUCATION

University of Florida – Gainesville, FL	Anticipated Graduation: May 2028
Bachelor of Science in Computer Engineering.	Cumulative GPA: 3.66/4.0
Relevant Coursework: Digital Logic and Computer Systems, Data Structures and Algorithms, Data Science for Electrical Engineers, Microprocessor Applications (in progress), Digital Design (in progress), Circuits 1 (in progress)	
Kyoto University – Kyoto, Japan	May 2026 – August 2026
<i>Study Abroad in Computer Engineering</i>	GPA: 4.0/4.0

EXPERIENCE

Student Government – Print Lab Station; University of Florida	April 2026 – Present
<i>Computer Lab Assistant</i>	
- Assist students daily (~15 hours/week) with printing needs, providing one-on-one troubleshooting for printer jams, formatting issues, and equipment operation in a high-traffic campus facility. - Deliver attentive, personalized customer service to every visitor, consistently receiving positive feedback and ensuring each person leaves with their issue resolved.	
SHPE (Society of Hispanic Professional Engineers); University of Florida	September 2024 – Present
<i>Android Mobile App Developer Director</i>	
- Developed new features and fixed bugs for the SHPE UF android mobile app as part of a development team. - Coordinated deliverables with teammates on weekly standups and managed Git workflow.	

PROJECTS

Custom CPU on FPGA; University of Florida	Spring 2026
<i>Solo Project</i>	
- Designed a custom CPU from the ground up in VHDL and Quartus schematic (BDF) capture, integrating an ALU, registers, and control logic into a working datapath programmed onto an Intel DE10 FPGA board. - Built a seven-segment display decoder to output computation results in real time on the DE10-Lite and verified the design through Quartus Simulation and Waveforms.	
Print Lab Status Monitor; University of Florida	August 2026 – Present
<i>Lead Developer</i>	
- Engineered a real-time printer-monitoring system on an Ethernet-connected ESP32, continuously polling all lab printers via SNMP to detect hardware faults with low latency. - Wrote the embedded firmware and a companion PowerShell service to surface faults through instant audible and text-to-speech alerts; adopted by coworkers across multiple shifts as a daily operational tool.	
Retirement Home for Horses – Website; Alachua County, FL	March 2026 – Present
<i>Lead Developer (Pro Bono)</i>	
- Built a full-stack website for a local nonprofit at the Code for Change 2026 Hackathon as part of a 4-person team, leading frontend development and deployment setup on Render; won Best Use of MongoDB. - Continued as sole developer post-hackathon, independently maintaining and enhancing the site (Python, MongoDB, and HTML/CSS) and working directly with the client to deliver feature requests and bug fixes..	
Familiar Places – Japanese Learning Game; Kyoto, Japan (Study Abroad)	May 2026 – August 2026
<i>Lead Developer</i>	
Built a first-person 2.5D Japanese-learning cashier simulator in Godot 4.6.3 (C#/.NET) with a 4-person team, owning the player controller, UI, and dialogue systems and migrated the codebase from GDScript to C#.	

LEADERSHIP

Mentorship – SHPE (Society of Hispanic Professional Engineers); University of Florida	February 2025 – Present
<i>Mentor</i>	
- Mentor first and second-year students (MentorSHPE) through weekly meetings, coursework and semester-planning advice, and engagement challenges. - Guided a high school junior through college applications (MentorSHPEJr), winning the program's mentorship competition for the most tasks completed.	

SKILLS

Languages: VHDL, SystemVerilog, C++, C#, Python, Kotlin, HTML/CSS, MATLAB | **Tools & Technologies:** Altera/Intel Quartus, QuestaSim, Git/GitHub, Arduino, Godot, Android Studio, SolidWorks, MongoDB | **Concepts:** Digital logic design, ALU & datapath design, finite-state machines, RTL & schematic design, waveform simulation | **Spoken:** Portuguese (native), English (fluent), Spanish (advanced), Japanese (beginner)
