

Lúisa Almeida Quintella

Gainesville, FL | +1 (352) 278-1661 | luisa.almeidaqui@ufl.edu

EDUCATION

University of Florida – Gainesville, FL

Anticipated Graduation: May 2028

Bachelor of Science in Computer Engineering.

Cumulative GPA: 3.66/4.0

Relevant Coursework: Digital Logic and Computer Systems, Data Structures and Algorithms, Data Science for Electrical Engineers, Microprocessor Applications (in progress), Digital Design (in progress), Circuits 1 (in progress)

Kyoto University – Kyoto, Japan

May 2026 – August 2026

Study Abroad in Computer Engineering

GPA: 4.0/4.0

EXPERIENCE

Student Government – Print Lab Station; University of Florida

April 2026 – Present

Computer Lab Assistant

- Assist students daily (~15 hours/week) with printing needs, providing one-on-one troubleshooting for printer jams, formatting issues, and equipment operation in a high-traffic campus facility.
- Deliver attentive, personalized customer service to every visitor, consistently receiving positive feedback and ensuring each person leaves with their issue resolved.

SHPE (Society of Hispanic Professional Engineers); University of Florida

September 2024 – Present

Android Mobile App Developer Director

- Worked with a team developing the SHPE UF Android mobile app.
- Debugged system errors and developed new features, improving user interface.
- Coordinated with team members in weekly standups to ensure timely and efficient task completion.

PROJECTS

TLDP (Technology & Leadership Development Program); University of Florida

August 2025 – December 2025

Student

- Selected for the inaugural cohort of an intensive, project-based program spanning AI/ML, web development, and microprocessor applications through weekly hands-on labs.
- Engineered a phone-locking box prototype with a partner: implemented Python control logic driving an Arduino Uno R3 for real-time servo motor actuation, with a supporting HTML/CSS web interface to trigger and monitor the locking mechanism.

Familiar Places – Japanese Learning Game; Kyoto, Japan (Study Abroad)

May 2026 – August 2026

Lead Developer

- Built a first-person 2.5D Japanese-learning cashier simulator in Godot 4.6.3 (C#/.NET) with a 4-person team, owning the player controller, UI, and dialogue systems and coordinating the team's Git workflow.
- Implemented keyboard-driven dialogue validation (LineEdit focus handling, Enter-to-submit, and full-width Japanese punctuation normalization for accurate matching) and migrated the codebase from GDScript to C#.

Retirement Home for Horses – Website; Alachua County, FL

March 2026 – Present

Lead Developer (Pro Bono)

- Built a full-stack website for a local nonprofit at the Code for Change 2026 Hackathon as part of a 4-person team, leading frontend development and deployment setup on Render; won Best Use of MongoDB.
- Continued as sole developer post-hackathon, independently maintaining and enhancing the site using Python, MongoDB, and HTML/CSS.
- Manage the full development lifecycle on GitHub with organized branching, pull requests, and automatic preview deployments on Render.
- Maintain ongoing client communication with the nonprofit, responding to feature requests, bug fixes, and content updates in a timely and professional manner.

LEADERSHIP

MentorSHPEJr Program (Society of Hispanic Professional Engineers); University of Florida

February 2025 – May 2025

Mentor

- Paired with a high school junior to guide her through college applications by leading weekly mentorship meetings tailored to her needs and goals.
- Won the mentorship competition by completing the most tasks throughout the semester.

SKILLS

Languages: VHDL, C++, C#, Python, Kotlin, HTML/CSS, MATLAB | **Tools & Technologies:** Altera/Intel Quartus, Git/GitHub, Arduino, Godot, Android Studio, SolidWorks, MongoDB, Linux | **Concepts:** Digital logic design, hardware/software integration, embedded control, servo actuation | **Spoken:** Portuguese (native), English (fluent), Spanish (advanced), Japanese (beginner)
